# 3 STEPS TO CHANGE YOUR

## 1 Choose your style

Whatever style you desire, you will find it with Garaga. Consider the different possibilities of **model patterns**, **layouts** and **windows**, and make a choice from among the models of our 3 different looks: Traditional, Contemporary, Carriage House.

## 2 Choose your color

Whether you opt for a classic color or one more modern, choose one that blends well with the other exterior features of your home.

## 3 Choose your construction

From among our varied garage door compositions, you are sure to find the insulation level and air infiltration performance (transfer of heat or cold between inside and outside) that you require.

## Why have more than 3.6 million GAR

### Superior performance

Get a product that exceeds your expectations. Our garage doors are **strong** and constructed with **long-lasting components**, rigorously selected.

### One of the largest selections in the industry

With **thousands of possible combinations**, you are sure to find the garage door you are looking for.

# GARAGE DOOR

## 3 layers, polyurethane insulation R-16 and R-12

- 1 Polyurethane insulation** acts as a thermal break to prevent transfer of cold or heat
- 2 InterLok™ joints** block air infiltration for superior thermal insulation
- 3 Wood end blocks** are one of the most effective thermal breaks

**Models:** Townships Collection, Standard+, Acadia 138, H-Tech and Top Tech

## 3 layers, polystyrene insulation

- 1 Polystyrene insulation** pressure bonded between two layers of steel for energy efficiency
- 2 2" tongue and groove** meeting rail to provide a weather-tight seal between sections, and rails are hemmed the entire length of the section for added strength and safety
- 3 Full length reinforcing plates** to solidly attach hinges and struts

**Models:** Village Collection, Vantage  **WINDLOAD\***  
Option —

## 2 layers, polystyrene insulation OR 1 layer, non-insulated

- 1 3 options of outside layer:** steel, heavy duty steel or commercial grade steel for high durability
- 2 Tongue and groove joints** between sections that fit seamlessly
- 3 Polystyrene insulation** available as an option

**Models:** Village Collection, Regal

 **WINDLOAD\*** 24 and N24 constructions only  
Option —

\* The Garage Wind Load Option is only available for specific regions. Talk to your local garage door dealer for more information.

# AGA doors been installed since 1983?

## A detailed quote for an informed choice

All the options you want can be **quickly** calculated then presented to you in a **clear, illustrated quotation**. Once your garage door has been chosen, your quotation is automatically transmitted to our factory to be **precisely custom-crafted**.

In garage door comparison tests, Garaga construction wins hands down. Watch our 45-second videos at [garaga.com/lab](http://garaga.com/lab) or scan the QR code.

## CONTRACTOR SERIES®

- Quiet
- Belt or chain drive
- ½ HP, AC or DC power

## Useful accessories

### Keyless and wireless entry system

- Open or close your garage door without using a remote control and program it with a 4-digit code

### Automatic Garage Door Lock

- To ensure greater security for your home, can be activated with your smartphone

Consult [garaga.com/res-openers](http://garaga.com/res-openers) or scan the QR code to view all available openers and accessories.

## myQ® Technology

Allows you to open or close your garage door from anywhere by using a smart device such as a watch, telephone, tablet or laptop.

# TAKE MEASUREMENT

1) Measure existing door opening's width **A** and height **B** in feet and inches. This determines the size of door needed. Never base your measurements on the size of the existing door but on the door's opening instead.

2) Measure for sideroom, left side **C** and right side **D**.

- 6 inches is required on each side for installation of vertical track.
- Make sure no entry door will interfere with the horizontal track of the door.

3) Measure area labeled "headroom" **E**. Distance between the top of the door opening and the ceiling (or floor joist);

- 8 1/2" is required for standard extension spring.
- 12" is required for standard torsion spring.
- Add 2" more for electric opener.
- If you have restricted headroom, special hardware is available.

*NOTE: If door height extends above the opening, the headroom measurement should be taken from the top of the top section to the ceiling.*

4) Measure area labeled "backroom" **F**. Distance is measured from the garage door opening toward the back wall of the garage.

- Door height plus 24" is required.
- Additional backroom (door height + 48") may be required for installation of an automatic garage door opener.
- Make sure no lighting or other material will interfere with the door sections when moving.

## Getting the opening ready

1) Make sure the size of the opening matches the size of the door. For example: a door of 9' x 7' needs an opening of 9' wide by 7' high.

2) The position of the header and back jambs (2" x 6") are very important. The header must be flush with back jambs (on the same plane). The back jambs must be perpendicular, plumb and square.

For more details, visit [garaga.com/measures](https://garaga.com/measures) or scan the QR Code.
